

Sounds are all around us
(sing to the tune of Wheels on the bus)
By Glenda Lindberg

Sound is made when things vibrate,
things vibrate, things vibrate.
Sound is made when things vibrate.
Sounds are all around us.

The pitch of a sound is high or low,
High or low, high or low.
The pitch of a sound is high or low.
Sounds are all around us.

The volume of a sound is loud or soft.
Loud or soft, loud or soft.
The volume of a sound is loud or soft
Sounds are all around us.

Whales and dolphins use sonar waves,
Sonar waves, sonar waves.
Whales and dolphins use sonar waves
Sounds are all around us.

Sound waves are measured in decibels,
Decibels, decibels
Sound waves are measured in decibels.
Sounds are all around us.

Bats can use echolocation,
Echolocation, echolocation.
Bats can use echolocation.
Sounds are all around us.
